COMPANY OVERVIEW

Established in 2019 by Mr. Pankaj Kumar and Mrs. Shalu, DPRODUCTO has rapidly grown into one of India's most trusted companies in IT distribution and services. With a strong nationwide presence, an efficient supply chain management system, and a highly experienced team, we deliver end-to-end solutions in IT distribution, technology integration, and support services—ensuring reliability, efficiency, and customer satisfaction at every step.

PRODUCTS OFFERING

INTERACTIVE FLAT PANEL

More Than Just A Display

Touch interactivity and collaboration are brought to life with the brilliance of our ultra-high definition, THE INTERACTIVE FLAT PANEL WITH ANDROID AND WINDOWS OPERATING SYSTEM. Our products take the lead in these flexible, multi-functional solutions with ultra-4K resolution, accurate on-screen writing, built-in whiteboard software, and wireless screen projection, satisfying the needs of a variety of applications. Discover our Smart range with unique features, combined with powerful applications and software, uniquely designed for collaboration in any education, business or collaborative environment. OUR SMART IFP displays and software help collaborate in any work environment.

VIDEO CONFERENCING EQUIPMENT

A video conferencing equipment is a technology that enables real-time, face-to-face communication between two or more participants in different locations using video and audio over a network, typically the internet. It allows users to interact as if they were in the same room, regardless of their physical distance.

MICROPHONES FOR VIDEO CONFERENCING & PA SYSTEM

Conference microphones play a vital role in ensuring high-quality audio capture and transmission during professional meetings and conferences, contributing to productive and efficient communication among participants, whether they are in the same room or connected remotely. Easy to use wireless system for public speaking with up to 10 compatible channels

ELECTRONIC LECTERN

Motorized Tilt With 21" Display CPU, Speaker & Microphone

These advanced tools combine traditional lectern features with modern digital capabilities, offering a seamless blend of technology and convenience. Equipped with touchscreens, integrated audio systems, and multiple connectivity options, digital podiums enhance the interactivity and engagement of any presentation.

DIGITAL STANDEE AND KIOSK

Loaded With All Features

Smartly designed Interactive Digital Kiosks come in many styles and configurations that are sure to meet the communication goals for many industries. It can be installed in the outdoors as well as indoors depending on the business need, to create a memorable user experience.

Available Size : 32" 43" 55" 65" & 75"

VIDEO WALL DISPLAY

Our indoor LED display

Fixed Indoor Led displays are design to deliver visual experiences in various indoor environments. It offers an ideal combination of superior picture quality and intuitive usability.

Our outdoor LED display

Our Fixed Outdoor Led displays are used for making digital signage and Bill boards. With there durability, high brightness, large format capabilities, dynamic content delivery, these displays empower businesses to make a bold impact in the outdoor environment.

LIGHTING ENERGY SAVERS

The LES Concept Application

- Large Offices – particularly Software & BPO facilities
- Shop floor lighting in Industries, particularly those that are dependent largely on artificial lighting
- Hospitals, Educational Institutes & Research laboratories
- Commercial & Residential complexes
- Campus Lighting

OUTDOOR LED PANELS

ROBOTIC PRODUCTS

Industrial Automation Lab

Sl No.	Product Name and Description	Qty
1.	PLC Training Workstation-Siemens S7-1215C	12
2.	Ladder Programing Software-Siemens make Step-7 Ladder programming Software.	12
3.	SCADA Programming Software: -Siemens Make WIN_CC Scada Software	12
4.	Industrial HMI-7" KTP-7-Siemesn Make HMI.	12

Industrial Sensor Technology

Industrial Hydraulics Lab

Industrial Pneumatic Systems

<u>Sensor Type</u>	<u>Primary Industrial Uses</u>	<u>Key Features</u>
Temperature • Digital output (RTD, thermocouple) • High-precision/humidity-integrated	Process control, safety (chemical, food, pharma)	• 24/7 thermal monitoring
Pressure • Robust packaging • Suitable for harsh environments	Hydraulic systems, pipelines, reactors	• Sensitive to pressure changes
Level (Ultrasonic) • Blind zone ~150 mm–1 m	Liquid/solid level in tanks, wastewater	• Non-contact measurement

Intelligent echo-processing		
Proximity (Inductive/Capacitive)	Position detection on production lines	Inductive: non-contact metal detection, durable
Capacitive: detects non-metallic, high precision		
Photoelectric	Object detection, counting	Long sensing range
Fast response		
Multiple modes (diffuse, retro-reflective, through-beam)		
Piezoelectric	Vibration, dynamic force, combustion monitoring	High frequency and linearity
Rugged; works up to 1000 °C		
Insensitive to EMI/radiation		
Hall-effect	Speed, position, current measurement	Measures magnetic fields
Used for proximity, speed detection		
IC-based, mass-produced; ~\$1 billion market		

Fiber-optic	Remote monitoring (temperature, strain)	Intrinsic sensing over km
Immune to EMI		
Used in oil wells, structural health		
UWB (Ultra-wideband)	Real-time asset and personnel tracking	cm-level positioning accuracy
Low power, multipath immunity		
Ideal for logistics, healthcare, manufacturing
